

Package ‘minfiData’

September 23, 2012

Version 0.3.0

Title Example data for the Illumina Methylation 450k array

Description Data from 6 samples across 2 groups from 450k methylation arrays

Author Kasper Daniel Hansen, Martin Aryee, Winston Timp

Maintainer Kasper Daniel Hansen <khansen@jhsp.h.edu>

License Artistic-2.0

RGsetEx	2

Index	3
--------------	----------

MsetEx	<i>An example dataset for Illumina’s Human Methylation 450k dataset, after preprocessing.</i>
--------	---

Description

This contains the raw data for 6 samples from Illumina’s Human Methylation 450k dataset. The data has been preprocessed.

Usage

```
data(MsetEx)
```

Format

An object of class "MethylSet"

Details

Currently, the pheno data for these 6 samples are masked. Scripts for creating the object is found in the `scripts` directory of the package and `extdata` contains the IDAT files. The data has been preprocessed using `preprocessRaw`.

See Also

[MethylSet](#) for the class definition, [preprocessRaw](#) for the preprocessing function, [RGsetEx](#) for the companion raw data.

Examples

```
data(MsetEx)
pData(MsetEx)
```

RGsetEx

An example dataset for Illumina's Human Methylation 450k dataset.

Description

This contains the raw data for 6 samples from Illumina's Human Methylation 450k dataset.

Usage

```
data(RGsetEx)
```

Format

An object of class "RGChannelSet"

Details

Currently, the pheno data for these 6 samples are masked. Scripts for creating the object is found in the `scripts` directory of the package and `extdata` contains the IDAT files.

See Also

[RGChannelSet](#) for the class definition, [MsetEx](#) for the companion preprocessed data.

Examples

```
data(RGsetEx)
pData(RGsetEx)
```
