Package 'HCAData'

Type Package

Title Accessing The Datasets Of The Human Cell Atlas in R/Bioconductor

Version 1.27.0

Description This package allows a direct access to the dataset generated by the
Human Cell Atlas project for further processing in R and Bioconductor, in the
comfortable format of SingleCellExperiment objects
(available in other formats here: http://preview.data.humancellatlas.org/).

HCAData   *Download data from the HCA via ExperimentHub*

Description

Download HDF5 (dense assay) and RDS (row and column annotations) files from the HCA via ExperimentHub, composing them together as a SingleCellExperiment object

Usage

```
HCAData(dataset = NULL, as.sparse = TRUE)
```

Arguments

dataset   A character string: which dataset should be retrieved?

as.sparse   Logical, specifies whether the underlying HDF5 dataset should be treated as sparse or not - will be passed to the call to HDF5Array(). Defaults to TRUE, i.e. by using the DelayedArray infrastructure.

Details

This current release includes the following datasets:

Census of Immune Cells - Umbilical cord blood UMI counts from the 10x (droplet) single-cell RNA-seq data. The object contains counts for 33694 genes in 384000 cells.

Census of Immune Cells - Bone marrow UMI counts from the 10x (droplet) single-cell RNA-seq data. The object contains counts for 33694 genes in 378000 cells.

Value

A SingleCellExperiment object with a HDF5Matrix in the counts assay, containing the UMI counts for each gene in each cell. Row- and column-level metadata are also provided.

Examples

```
HCAData()
sce_cordblood <- HCAData("ica_cord_blood")
```

HCAData-pkg	*HCAData: Accessing The Datasets Of The Human Cell Atlas in R/Bioconductor*

Description

HCAData is an ExperimentHub package which provides access to the single-cell RNA-seq data from the Human Cell Atlas project (<https://www.humancellatlas.org>)

Author(s)

Federico Marini <marinif@uni-mainz.de>

References

If you use the data in this package, please refer to the original sources (Human Cell Atlas Data Portal, <https://preview.data.humancellatlas.org>) as well (plus the related publications, which will be listed here when they will be out), which are licensed under a Creative Commons Attribution 4.0 International License.
